using microelectrode recording*

Sterile, Ready-To-Use microTargeting[®] Electrodes

**NOW
AVAILABLE**

Accurate

Confidently place Deep Brain Stimulating (DBS) or lesioning electrodes with assurance of cellular-level confirmation of target.

Efficient

Perform all electrode operations through integrated drive and guide tube system using precise, precalibrated components.

Sample additional tracks without repositioning drive or stereotactic system.

All components are steam sterilizable or isolated with pre-sterilized drape sleeve.

Proven

Hundreds of surgical teams already use FHC's innovative microelectrode technology derived from our over 30 years experience as the world's leading manufacturer of research and clinical microelectrodes.

Innovative

FHC's research heritage and custom fabrication capabilities allow us to work closely with field leaders to further enhance microTargeting[®] technology.

Reliable

FHC supports microTargeting[®] products with comprehensive training, technical support and service.

All microTargeting[®] products are cleared for clinical use within the United States and European Union.

CERTIFIED
ISO 9001

FHC is pleased to announce that our most popular lengths of microTargeting[®] microelectrodes are now available in convenient, ready to use, sterile packaging.

Individually pouched and bulk packaged in units of five, the microelectrodes are ready for use for up to 3 years. Waste, caused by having to sterilize extra electrodes in case of damage or mishandling, is eliminated.

Of course, FHC will continue to offer its complete line of microTargeting[®] microelectrodes in ready-to-sterilize packaging.

The following sterile Ready-To-Use microTargeting[®] electrodes are recommended for use with the FHC microTargeting[®] Drive:

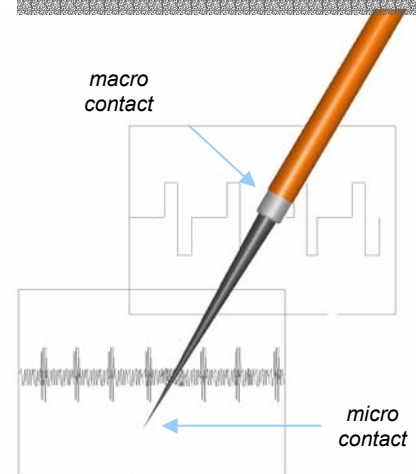

mTDWBP(BP)(BP7) Differential Tungsten 1
Meg Single electrode Pk. 5

mTDWBP(AR)(AR2) Differential Tungsten 1
Meg Array Electrode Pk.5

For pricing and ordering information please refer to our current Price Lists L017S-01 (US) and L017S-01-EU (Europe) posted on our website at www.fh-co.com.

- Individual sterilized microelectrodes
- Minimize handling – use immediately from easy to open sterile pack
- Use when needed – no need to sterilize extra units “just in case”
- Saves money – eliminates waste

**NOW FDA CLEARED FOR
STIMULATION!**

- Evaluate efficacy and side effects
- Provide a second level of assurance prior to DBS lead placement
- Limit the number of penetrations
- Universal Adapter for all commercially available medical grade stimulators
